**The Orthopedic Technology
Course of the
American Society of
Orthopedic Professionals
and the
American Association of
Orthotic Fitters**

The Orthopedic Technology Course, through the 35 hour hands-on and 25 hour distance learning components, is designed to provide the attendee with the required knowledge to become a valuable part of the orthopedic office.

All those completing the course will have the necessary skills to work in an orthopedic environment providing modern immobilization and supportive techniques to orthopedic injuries and diseases under the supervision of the orthopedic surgeon.

By limiting the class to only eight students and having a student/instructor ratio of 4 to 1, every attendee will get the personal attention to ensure their success.
